

T-1000 by Nemo Liu & Hanson Chien - Black

Pull a solid metal band straight through another.

No sleights, no weird grips, no cover - pull it straight through!

There's a reason magicians and audiences gravitate to tricks like linking rings and crazy man's handcuffs. Simplicity is power.

No explanation needed. The spectator knows that it shouldn't be possible, so when it happens, it's MAGIC.

Features:

- Visual.
- Practical.
- No Angle Issues.

The beautifully-machined gimmicks can pass through each other, rubber bands, pens, fingers and other similar objects. A flawless penetration. They see nothing.

- The instructions are supplied through a practical download video link. They are in English, but easily understandable by anybody thanks to the clear video.
