

Rising Cards

Despite its simplicity, this is one of the best, and most practical rising card effects available. The effect is very well known: a card is selected by a spectator, and put back in the deck. Then mysteriously the card slowly rises from the pack! Here are the fine points that makes this system unique:

- The deck used is a normal deck and could also be borrowed.
- The spectator can freely check the cards before and after the effect.
- You can even make the selected card slowly come out of a deck that is spread on the table.
- Supplied together with 1 gimmick and two spares, is also a regular deck of bicycle playing cards poker size.
- The gimmicks supplied are very resistant and can be carried around comfortably all day being ready to use at a moment's notice.
- Together with clear written instructions for the basic effect we have supplied also a link to video instructions both for the standard effect and also for showing how the card rises from the deck when it is spread out on the table.
