

## Think of a Number - Ultimate

We are proud to introduce you to our PROFESSIONAL version of the classic "Think a Number" trick, that will fool even those who know the diabolical secret to the old version.

### READ CAREFULLY:

The magician hands out 6 cards jam packed with many different numbers on them, he covers his eyes, and asks a spectator to simply THINK of any of the numbers on the cards (at no stage will the spectator name his thought of card). Always with his eyes covered, the magician stretches out his hand, and asks the spectator to look at the cards, and simply put FACE DOWN on the palm of his hand the cards where he can see the number he is thinking of.

The spectator hands the magician a few face down cards. Now under these absolutely impossible conditions the magician is able to tell the spectator the number that he is simply thinking of!

The effect can be repeated as many times as you like with a different thought of numbers.... just go ahead and read their minds each time!

- Printed by USPCC for DiFattaMagic on Bicycle cards.
- Shocking mind reading miracle that you can easily carry in your pocket.
- Spectators can freely think of any number between 1 and 63.
- A new system for reading into your spectator's thoughts.
- Very Easy to perform.
