

## Dice Pyramid by Tora Magic

The magician shows 4 black dice of different sizes. He places them on a base and arranges them by placing them one on top of the other, like in a pyramid, from the largest to the smallest. Then he covers them with a tube shown empty and closes everything with a lid. Then, he turns the tube upside down and when he shows the dice again, their order will not have changed! He repeats everything several times, always turning the tube upside down, but the order of the dice never changes. Finally, when he shows the dice again, they will have changed color!

- Tora Magic quality.
- Lovely effect and easy to do.
- Everything is carefully made of wood.
