

Princess Card Trick Plus (Bicycle)

Here is a great classic of mental and card magic that has been performed by many of the greatest magicians... even by David Copperfield!

This version is like the ever popular trick but with an extra twist at the end.

In short the magician fans a packet of cards before the spectator's eyes. He asks a spectator to simply think of ANY of the cards (no force).

The choice will be at all times ONLY in the spectator's mind. After concentrating the magician removes one of the cards and leaves it in sight sticking out of his pocket.

The packet of cards is shown again to the spectator and only one card is missing... exactly the one the spectator is just thinking of!

Now for the twist as the magician tells the spectator to remove the card he is thinking of from his mind, imagining that the ink is disappearing... and the card that was taken from the packet, turns completely BLANK!

A must have for any magician or mentalist!

- Printed directly by the USPCC on Rider Back Bicycle cards
- Very easy to perform
- Instant reset.
- Clear instructions included
