

Impossible Card Balance (Red) by Chiam Yu Sheng and JT

Impossible Card Balance

is a novelty effect created by Chiam Yu Sheng from Singapore.

A spectator selects a card; magician balance it on top of the deck. To prove the card is not connected to the top card, the magician takes the top cards off the deck, even by piles. Finally, the magician snaps his finger, the balanced card drops off the deck.

Advantages:

- Very practical, perfect for performing in front of live audiences.
- More than one card can be balanced on the deck.
- Super easy to do.
- No magnets, no sticky stuff, convenient to handle.

"That is amazingly clever. You will love performing this routine, even for your magician friends. They will not have any clue!"

- Ron Timmer

"You are a very creative magician. It's so simple to do."

- Brendan Rodrigues

"Once again, Yu Sheng proposed a very interesting way to make a classic even better! The gimmick is easy to use, and this is what I like the most!"

- Jordan Victoria
