

## **Paradoja by Michel**

### **Paradoja**

is an impossible unsolved mystery, where the ENTIRE AUDIENCE gets involved. You will entertain a baffle all ages.

You will learn 4 amazing routines:

### **The Mystery of the Matches**

On the table, the magician forms a square with ten matches on each side. Many other matches are handed out to several spectators and one of them is asked to put a match on any side of the square. However, after some "magic movements", we can surprisingly count only ten matches again in each side of the square. This is repeated MANY TIMES with different spectators (up to 10 or 12 times), and again we can always count ten matches on each side of the square.

But, where do they go?

At the end, you make them reappear inside the matchbox that was previously seen empty and in the sight of the spectators ALL THE TIME!

It is a fantastic effect, with a lot of participation from the audience and which grows as the challenge continues.

### **Tutankhamen**

The magician shows the mystery of the pyramids of Egypt and why they remain intact.

### **Bermuda Triangle**

Do you know the enigma of the Bermuda triangle? In this routine Michel shows everyone how the ships disappear in the sea.

### **The Castle Wine Cellar**

Here you will see how they stole the wines out of the owner of a castle.

## Highlights:

- Really fooling principle.
- You can repeat it over and over!
- Easy to do.
- Four amazing routines.

## You receive:

- A specially gimmicked Bicycle card case and 2 matchboxes (matches not included) that allows you to make a secret switch right in front of the audience.
