

## Atom 2 Smart Remote by Electricks

### Atom 2 Smart Remote

- Compact and powerful design.
- Direct SB Watch and PeekSmith 3 communication.
- MagiScript support with endless possibilities.

### Introducing our Smart Remote

Our intelligent remote Atom 2 is ready. It has 12 silent buttons, a vibration motor, an RGB LED, and an accelerometer. You can run mini apps on it created by us or our community, written in a language called MagiScript. It is a revolutionary device and has become a platform for everyone interested in electronic mentalism.

### It's Game-Changing

We think our new product will challenge your current thinking about its category, and we are dedicated to discovering new territories. This mentalism power tool will give you stunning new features. It's a kind of magic.

The product is compatible with our apps, and we are working with developer friends to ensure wide support. New features will be added throughout the year.

### What's Included?

- Atom 2, our smart remote.
- USB-C charging cable.
