

Predicto (Holiday) by Jonathan Sadowski

You show a stack of different popular holiday gifts like new puppy, air fryer, magic kit etc.

There a prediction in an envelope that remains in view the ENTIRE time. Face down, the cards are dealt on at a time and the spectator calls stop at any time! The gift is looked at by ONLY the spectator. You open the envelope to show your guess... and are wrong! What!!? But you have a second prediction in the envelope...also wrong. Your guess three and four are also incorrect!! You ask for the what the gift is and you flip over each one of your incorrect guesses and the make up a picture of the chosen gift!!

This is so good and clean! Although we don't even recommend repeating a trick, you can repeat it with a different outcome! You'll get 2 outcomes, video instructions and some great tips on how to perform it!

It resets the second you are finished!

There are NO moves.

Great for walk around!
