

Witchfinder by David Forrest

Witchfinder

redefines the packet trick! It's a full deck effect, but it's a packet trick at heart!

Effect: A freely selected and signed card is lost somewhere in the pack. A packet of four cards depicting four innocent, puritan women is shown. Being accused of Witchcraft, three of the four run and hide in the woods - the cards are turned face down where a moonlit forest is depicted. The last girl fails to hide in time and is caught by the Witchfinders. She is turned over to reveal her fate - BURNED as a WITCH!

But, what of the other three?

The cards are turned over to reveal that the young women have now taken their true form - all three have changed into grotesque witches - and they have a message...

The exact position of the spectators' card in the pack is correctly predicted by the witches!

Includes: The special set of custom Witchfinder poker sized playing cards and thorough online video instruction.
