

Fire wallet - Professional

The magician pulls out a wallet from his jacket, but when he opens it, it bursts in fire! The wallet is now closed and reopened. The flames will be gone and the magician takes out of it, cards, silks, sponge balls, or anything else he may need for his act.

A great effect to introduce a routine with what you have just "extracted" from the flames.

- The quality of the wallet is definitely good!
- The wallet is made of genuine leather and measures 11.3 cm (4,44") x 9.5 (3,74") x 1.5 (0,59"). Banknotes, of course, are not provided.
