Pierrot Prediction by Richard Griffin

Effect

An envelope containing a prediction is shown. Part of the prediction can be seen throughthe hole in the envelope.

A spectator is chosen. Two clown bow ties are shown, one redand one yellow. Spectator has free choice of anyone, he is then instructed to put it on.

A red and a yellow clown hat are then shown, and spectator has free choice of any oneand instructed to wear it. Finally, a red and a yellow clown nose are shown and againspectator has free choice of any one and puts it on.

Prediction is then pulled from theenvelope to reveal a clown face matching exactly what your spectator has chosen.

Only one prediction in envelope free choice each time, no forcing.Easy to do, no skill required Packs small, plays big.

- Quick reset Perform to music or patter.
- Online video instruction.

Please Note:

This new version works on a different method to the original but still has thesame great routine.
