

## Sweet Repeat by GRUM®

Classic of magic with a super sweet twist! Super fun interactive magic by Ari Phillips and Mona Kowalczyk!

Cleverly based on the 6 card repeat, a true classic of magic with a super sweet twist!

### Effect:

You present 6 packs of fun and colorful popping candy to the audience. During your act you put a packet in your pocket, drop one, hide one or even give a real sweet pack away! You do this several times during the show... (up to 6 times) but every time you do so you always end up with 6 packs of sweets!

### Skill:

Simple self-working effect great for beginners to professionals!

Great fun and interactive magic suitable to perform for all ages. Fantastic for the family and children's entertainers!

This clever gimmick is ready to go straight out the box.

**Sweet Repeat** has been designed to match real popping candies you can actually buy to match 'fizz wiz' popping candy.

Even the fake packs sound like there are real sweets in them too! So, you get the visual and sound effects too!

You can switch out the gimmicked packets for real ones if you choose to purchase candies to hand out during your show. Although you do not have to give them away, if you choose to give them away during the show you can do so easily and always get refills.
