

LS Roadtrip by Leo Smetsers

LS Roadtrip

is Leo's creative twist on Robert Neale's classic trapdoor card, and as always, Leo has crafted a fun and commercial presentation! This time, it's all about the quirky question of which side of the road people drive on. The effect looks impossible, yet it's so much fun to perform, and because the package includes multiple cards, you can even hand them out as memorable souvenirs.

LS Roadtrip is super easy to perform, with no need for switches or sleight of hand. The laminated cards are durable, meaning you can use the same card over and over again, and if you don't give them away, the package will last you a very long time! Plus, it resets in seconds and can be performed multiple times.

This is the perfect piece of magic to carry in your wallet, quick, easy, and a bit of weird wonder that will leave your audience amazed!

Special thanks to Gert Jan Segeren (dokter Goochel)
