

Size by Viki Gong and Amor Magic

Size

is the creation of Viki Yu, simple three cards can make the atmosphere of the scene, in 2024 Blackpool magic conference in the UK, Size has become one of our best sales card magic, sure enough, some things, the earth people can understand.

The performer shows that there are three cards in his hand, all printed with a very short soft ruler pattern, and he asks the spectators, "What's the most important thing for a man?" no matter what they answer, the performer says, "Let me tell you, is SIZE!"

Some of the spectators would laugh. Then in the performer's pull down, the pattern on the card has become longer, now performer says, "Do you know what's the most important thing that women care about a man... it's not the size, it's hardness!!" and the last pattern has become a very hard tape measure!

The original version of the author's presentation will be a little "scale", but you can give your own interpretation.

- Bicycle size.
- Requires basic skills, but easy to use.
- Suitable for relaxing and casual occasions.

Products include:

- Special cards & guide video.
