

Third Degree Burn The Evolution by Jason Palter and Alan Wong

Third Degree Burn 3.0 - The Evolution by Jason Palter and Alan Wong

It's back, and BETTER than ever!

Any card + Anytime = Third Degree Burn 3.0 The Evolution

Don't just let them have it-give 'em the Third Degree.

Third Degree Burn was the best-selling, most mysterious, no force, and versatile card blister effect ever created! The 2.0 release improved on that...and now the totally revised 3.0 version completely enhances this trick. Imagine flipping-out a spectator when a blister of their thought of card appears on your finger and thumb! This is one of so many possibilities you can do with this stealthy, amazing and easy-to-learn gimmick.

It's The Invisible Deck without the cards-and with more HEAT!

The Third Degree Burn 3.0 gimmick has been upgraded from the previous versions!

New improved features include:

- **Easier to use gimmick-redesigned and now more user-friendly than the original.**
- **New gimmick eliminates the bulky nut from earlier versions, so it is now completely flat.**
- **The gimmick has been reengineered, so it is now even lighter.**
- **Brand new instructions include many presentation ideas.**

The Mind-Boggling Effect:

Ask someone to think of a card and visualize it in their head-to burn it into their mind. It can be any card they wish. There is no force. To aid them with this "burning", you give them a lighter (or just borrow theirs). The spectator lights the lighter and tries to visualize their card in the dancing flame. You briefly thrust your fingers into the flame, and wince with the pain. For the jaw-dropping climax, you slowly turn your fingers around, to reveal that the skin on your thumb and finger is now blistered in the shape of their freely chosen card! You've just gave them the third degree!

Just like with the original, the same INCREDIBLE key points remain the same:

- **No deck of cards required.**
- **No forcing; works with any card.**
- **Can be carried with you at all times, easily fits in your pocket, always hidden, and always ready to go.**
- **No reset (again, it is ALWAYS ready to go)!**
- **Use as a perfect "out" in a card routine, to reveal a forced card whose value you've accidentally forgotten.**
- **Harmless-but it does look dangerous! You don't even have to use fire if you do not want to.**

Comes complete and ready to go with the professional custom gimmick (made to last a lifetime), instructional video, link for PDF file with detailed manuscript, full routine, and loads of different presentations (including routines that DO NOT require the use of fire).
