

## In the Frame by Mark Elsdon

The frame you can see on the front cover is an ordinary, examinable picture frame. And the card inside - the prediction - IS the spectator's signed selection!

They said it couldn't be done... they were wrong!

The effect of **In The Frame** is as simple as it is powerful: a **signed** selection vanishes from the deck and proves to be the card that was on display in the picture frame the entire time.

This is all accomplished with **minimal sleight-of hand** (no palming!) and a **regular deck**. No fumbling, no extraneous props, no awkward 'clicks' or any other tell-tale sounds. Walk up to a table with just the picture frame and a regular deck and you are good to go. Easy reset and nothing to replace.

**In The Frame** is not just another 'solution-to-a-problem' but a completely practical, commercial piece of magic and is **perfect for both close-up and cabaret** performance.

Comes complete with the picture frame, gimmick and full instructions.
