

Pierced Coins

Finally perfect also for European coins!

The magician shows three coins and puts them inside an elegant plastic case. He then covers the coins with a slip of paper and closes the lid. Now three pencils are dramatically pushed through the pencil case, magically piercing the coins! When the slip of paper is removed, the coins are still there, whole and unharmed, and everything can be handed out for examination.

- The item is made of good quality plastic.
- The Trick is very simple to perform.
- Detailed instructions are supplied
