

No Bag Force by Gonzalo Albiñana - Bühnentrick

We know that your imagination truly has no limits, so we bring you a tool, a useful accessory that will allow you, without any complications, to easily and diabolically control predictions, results, forces... all kinds of effects, phenomena, arguments... even better, practically all kinds of objects.

A tool that will finally give you all the freedom promised. Imagine having all the advantages and possibilities of the change bags, and also, of the traditional force bags, only without having to use any bag, any clothing restrictions, any complicated mechanism... absolutely nothing, just your two cupped hands. Imagine being able to control the process and the result 100%, always, without any problems or errors.

Imagine putting into practice the best methods and principles of magic and mentalism, such as the One Ahead Principle or Thrown Cards, without having to use any of the conventional techniques or elements. Imagine that a person opens, for example, a bag of balloons that had been sealed until that moment. Imagine you reach in and pull out a few, which they can clearly see. Imagine someone picks one at random... Now, the stage curtain opens to reveal hundreds of balloons inflated in the same color. Imagine someone does the same with a bag of confetti. You give them a choice, and you hand out Kabukis to several spectators (as many as you want). Imagine you ask them to pop them at the same time, and to sit down if the color matches their choice. They all do. What kind of final prediction could be more powerful than filling the stage with euphoric people popping confetti everywhere?

Imagine someone gives you a sheet of newspaper, and you start to tear it all up very clearly. Imagine someone picks one. Maybe a word, maybe a photo, maybe a headline? Now you could reveal it as a burnt sum, as a giant banner, with a tattoo, in a giant graffiti, a hot air balloon... Go crazy! Imagine any kind of prediction, maybe in smaller formats, a simple Post-it note, some coins, some candy, handkerchiefs, ballots... You can use No Bag in any format, for any kind of magic, in any situation.

- The method is very simple, and practically invisible.
- The method is a new method, not explored before.
- It can be adapted to any element or idea, and there are proposals and solutions for multiple outputs, results, options...

- Anyone can use it, in any condition.
- A No Bag accessory is included. Afterwards, you can adapt them, or increase your kits with more units.

In the tutorial you will learn about the history of shifting and forcing bags, how to make and adapt your No Bags props, the use of other tools, handling and almost an unlimited amount of ideas for presentations, routines, revelations.
