

Floating Bottle

The magician shows the audience a little red rope and a small yellow bottle. He slips one end of the rope into the bottle and turns both the bottle and the rope upside down together. Now for the mystery: the magician gently releases the rope, and somehow, it remains suspended inside the upside down bottle. After this first effect, the magician straightens the bottle and the rope again. This time, he slowly release his grip on the bottle, and inexplicably, it remains suspended, mysteriously hanging from the rope! Immediately after this magical suspension, the magician hands both the bottle and the rope to the spectators, for whom repeating the small miracle they witnessed will be absolutely impossible!

- The bottle, made of high quality plastic, can also be separated in two parts.
- The trick is very simple to perform.
- Detailed instructions are supplied.
