

Helper's Spider by Sorcier Magic

Helper's Spider by Sorcier Magic

For the first time on the market, a Sorcier Magic exclusive. This is a new magic trick suitable for a small audience, ideal for smaller performances. Show an aluminum and plexiglass stand. The audience will immediately notice a large empty spider web, and at the base two transparent semicircles that act as card holders. Also show a rigid glossy paper box, stating that your helper is inside. Take a deck of cards from your pocket and ask them to choose any card. The card can also be signed.

The card is scattered in the deck and shuffled. Now the entire deck is brought to the base of the stand just under the spider web. Now all you have to do is ask your SPIDER helper for help to find the card chosen by the spectator. Open the box and take your helper who will attach himself to the center of the spider web. After an instant he will begin to slowly descend to grab the card chosen by the audience and pull it up. Needless to say, the card grabbed by your helper will be the one you chose.

It is an effect that goes very well with funny stories, it will not fail to amaze your audience. The special support, the plexiglass spider web, a special card, the remote control and of course the magnetic case for the special SPIDER is provided. Attached are the video instructions to best achieve the effect. It works with two CR2016 batteries (3 volts) and two 16340 (3.7 volts).
