

Vanishing Wine Bottle

The magician shows the audience a bottle and pours out some liquid from it into a glass. He then carefully places the bottle into a paper bag and announces that he will make it vanish.

After some funny bits of comedy where the bottle never seems to really vanish, the magician dramatically crumples up the paper bag, and makes the large bottle completely disappear!

A great classic effect, very easy to perform!

SUPPLIED

- A special realistic compressible rubber bottle.
- An special insert for the liquid.
- Two special labels.
