

## Die Vision

Show a little box and a die with a differently colored dot on each side. Ask a spectator to choose a color and to shut the die inside the box with the chosen color facing up. While he's doing so, your back is turned.

Now, have him give you back the box perfectly closed, and concentrate, trying to visualize with your mind the chosen color. After a moment of hesitation, reveal the chosen color and, finally, hand everything out for examination.

- The box and the cube (full and with some weight to it) are of excellent quality.
- Easy to perform
- Detailed instructions are supplied
