

Z-Wallet Deluxe (Dozen)

This little holder will allow you to perform real miracles.

For example, you can transform money (banknotes) into business cards.

It's very simple. Open your case and show that you're loaded - both pockets are full of bills. Then close the holder, and when you open it for the second time, the bills transform into business cards. But the possibilities are endless. You can turn a white card into a printed one, restore a torn card, turn a playing card into a business card, print a photo...
