

## Switchblade by Rodger Lovins

This small holdout device is magnetic and can be placed most anywhere. Outside of your back pocket, under the tail of your jacket, on your belt or anywhere else you may like to switch out, make a steal or drop off a vanish of your knives or any small object that can be held by a magnet! I have used it to produce a small metal wand and our steel shimmed Sharpie!

**Our "S.S.SHARPIE" (Steel Shimmed Sharpie), is sold separately.**

Plus "**SWITCHBLADE**" can be used with most all brands of color changing knives!

Check them BOTH out!

Here are what others are saying about "**SWITCHBLADE**"!

*"This is so small yet powerful. Works well for the vanish or production of my color changing knives."*

*"I use it with the Rodger's Shimmed Sharpie to produce and vanish it at will. It is very quiet!"*

*" I bought 2 of these. One for my left and one for my right side jacket."*

*"Works with all my knife sets to orient them correctly in my pocket! Pocket organizer and holder in one, Love It!"*
