

Flower Fountain

This is a beautiful prop: a set of 25 large spring flowers, perfect as production supplies!

The performer can use this set of flowers to produce them from the props suitable for production, such as Pan, Square Circles, etc.

- The strong spring action quickly opens the flowers and they will appear to flow like a fountain.
- The all-Mylar construction makes them many times more durable than paper flowers while also making them visual and eye-catching.
