

New Wave (USD Version) by Victor Sanz and João Miranda

At the 2024 Blackpool Magic Convention, **New Wave** by Spanish magician **Vic-tor Sanz** was shown to **João Miranda**, who was immediately fooled and clueless about the method. When João found out the secret, he fell even more in love with the trick. Even the legendary Dani DaOrtiz was fooled. This effect isn't just another take on the classic B-Wave, it's a revolution that elevates it to a new level of impossibility.

The Effect:

Your spectator freely names any value, from Ace to King. You remove a set of cards from your wallet, which holds not only the cards but also your cash and bank cards, enhancing its authentic look. Then, the spectator is asked to select a color, and then a suit. As the cards are spread in your hands, the spectator's chosen card is the only one face-up among the others. But the astonishment doesn't end there: it's the only card with a red back, while the others have blue backs, and they are blank on the face: these cards were never real!

Why You Need New Wave:

- **Unforgettable Double Impact:** The chosen card is not only face-up but also has a contrasting back color, creating two stunning surprises in one moment.
- **Elegant, Gimmicked, Custom-Designed Wallet:** Crafted from real leather and ingeniously gimmicked, this wallet was designed from scratch for this effect, allowing for smooth and deceptive handling that feels completely natural.
- **Engineered to Fool:** This isn't just for lay audiences; **New Wave** is crafted to leave everyone questioning the method, even seasoned magicians.

New Wave

is more than a trick, it's an essential weapon for your arsenal, turning a classic mental miracle into a multi-layered experience that leaves audiences stunned. If you're looking for a surefire, high-impact effect that's as powerful for magicians as it is for lay people, New Wave is the game-changer you've been waiting for.

Note: With this effect, some DIY is required, and all the materials are included.

Please choose your version: **Dollars, Euros, or Receipts (Universal Version).**
