

Plastic Paisley Poker Red by Dutch Card House Company - Pokerdeck

The **Dutch Card House Company** is presenting for the very first time: Custom designed **Paisley's 100% Plastic Playing Cards!** Perfect for games that see heavy use, these cards boast water resistance, a thicker PVC stock, flexibility, and enhanced handling, ensuring more hands per hour for your (poker) game!

Plastic playing cards are notable for their high durability. Unlike cardboard cards that wear out quickly, plastic cards can last up to 30 times longer. When playing poker or other card games, the major drawback of cardboard playing cards becomes clear, they tend to bend upwards when you lift the corners. This issue doesn't occur with our **Paisley plastic playing cards**, as they always return to their original shape.

LIMITED PRINTRUN OF 250 EACH!
