

Celestar by Dr. Cyril Thomas

Celestar

is one of the most ingenious and practical gimmicks ever created. Its method is so new and clever that it is guaranteed to make you smile every time you use it.

This deceptively simple piece of plastic offers not just one, but two ultra-visual card revelations.

With Celestar, you'll create a mesmerizing illusion where shadows of stars gradually move and reshape themselves to reveal the names of both chosen cards.

This gimmick is so easy to use that even my cat Gaston could master it! There's nothing to add and nothing to hide. Everything is self-contained within a durable, unbreakable keychain designed to last a lifetime.

In less than a minute of tuition, you'll be ready to practice and amaze. This gem feels like it's straight out of space-and it will light up stars in your audience's eyes.
