

Alakazam Presents Stixx by Eric Stevens

Eric Stevens

is the undisputed master of the classic Hot Rod, and in this special project, he unveils his latest and greatest work, transforming this visual effect into mind-blowing routines. Eric leaves no stone unturned, teaching you all the moves, tips, and tricks he utilizes when performing with this incredible prop.

But STIXX is more than just routines. Eric has redesigned the prop, eliminating the awkward spelling color selection - now the color selection looks completely fair! Furthermore, STIXX is the most comprehensive set of Hot Rods ever created, featuring Eric's transparent rod, which he uses to visually vanish the colors from the Hot Rod before making the rod disappear completely.

Joining Eric on this project is the legendary Craig Petty, who discusses the routines and handling he has been using at gigs with this amazing set for over a year.

The STIXX project includes five custom-designed Hot Rods and a full, in-depth tutorial video, which features an updated handling of Eric's original Color Stix routine.
