

Poker Packet Trick by William Tyrell

A rapid-fire visual masterpiece that will have their eyes popping out of their heads.

William Tyrell is one of the fastest growing stars in magic. His creativity is boundless, and you can experience it for yourself with **Poker Packet Trick**. This easy-to-do routine is a ton of fun to perform and will leave everyone speechless.

An ace and a two visually transform into a pair of twos. Then, after adding in a three, all of the cards instantly turn into threes. You repeat this with the fours, leaving you with a four-of-a-kind filled with fours.

This is a hand that would win most poker games. But it's not good enough for a magician. So, as a shocking finale, you transform the hand into a royal flush in the blink of an eye. They truly won't believe what they're seeing.

Poker Packet Trick offers a little something for everyone. Its practical method and instant reset make it great for walkaround performers. Yet it's also quick and visual enough to fit perfectly on all your social channels.

Don't let the fact that it's a packet trick fool you either. **Poker Packet Trick** does not have any of the suspicious moves or false counts that are often found in other packet tricks.

In fact, **Poker Packet Trick** is deviously simple. There are no magnets or elastics, nor is there anything to ditch or steal. The custom-made gimmick gimmicked cards printed by **Vanishing Inc.** on high-quality Bicycle stock handle all the hard work for you. If you can turn over a card, you have all the skills needed to perform this amazing effect. You'll be able to do the whole routine within minutes of opening the package.

Poker Packet Trick is the ultimate everyday carry. It fits right into your pocket or can even be added to the deck of cards you're already using. Get yours today!
