

Mortenn's Jumbo Card Trick by Mortenn Christiansen

FISM-Winner **Mortenn Christiansen** presents a jaw-dropping prediction routine that's easy enough for any magician or mentalist to do.

Mortenn's Jumbo Card Trick is your chance to learn why many magicians consider **Morten Christiansen** to be one of the most creative magicians in the world. This deviously clever gimmick allows you to perform a ridiculously fair and impossible prediction routine, without breaking a sweat.

You place a jumbo card face-down somewhere that is in full view of the audience. A regular deck of cards is then handed out to be freely shuffled. Then, a member (or members) of the audience help you eliminate the cards down to one card. Every decision they make is a completely free choice. Yet, somehow, the final remaining card matches your prediction.

There are no forces or equivoque. They really can choose whatever card they want. So, while **Mortenn** does teach you his full presentation, you also have the freedom to have a card chosen in any way that fits you best.

The custom-made gimmick is built right into the innocent-looking jumbo card. Each one was handmade to perfection by **Vanishing Inc.** from high-quality Bicycle cards and will last you countless uses. Since the gimmick handles all the hard work, you can focus all your energy into creating the best experience for your audiences.

Mortenn's Jumbo Card Trick is a practical worker that packs flat and plays huge. While it clearly works well in parlor and stage environments, it's also a great fit for dinner parties, BBQs and even formal close up shows. Comes with custom gimmick and complete video instructions. Just add in a regular deck of cards and you'll be ready to start blowing minds within minutes of opening the package.
