

FROGGY 2.0 (BLUE) by Erick White

Erick White has created an improved version of our first version of froggy, now ready to use out of the box. You just need to fold a card, have a deck of cards and you are ready to amaze them.

We presented it at Magic Live and the audience could not stop being amazed by the method used in this device. It is fast, invisible and you end up with clean hands. The best comments from so many magicians at the convention were:

"I can't believe what I'm seeing"

"You've never seen anything like it."

"It's very clever, you start and finish cleanly."

An effect that you can use in parlor magic, close up or stage 100% real. It looks like magic!

Effect:

Show a prediction card at all times. You put it on top of the card box. The spectator can choose any card at random, sign it and lose it in the deck of cards. Magically the signed card disappears. But it has not disappeared, at all times and from the beginning, the spectator's card was the prediction card.

Update:

- Explanatory video with easy-to-execute routines and extra ideas. You need to know how to do a mercury fold (I'll show you how) to perform **Froggy 2.0**.
- Quality and durable materials to use it many times.
- Fake bicycle paper cards include red and blue.
- Extra accessories to replace (I'll show you how to do it).
- You can use Froggy to make bicycle card switches, post-it, bank notes and anything else you can imagine that can be inside the box.
