Deqode by David Jonathan and Kevin Aust

The most comprehensive project ever in the QR / Barcode prediction plot! Works on both iOS & Android!

David Jonathan & Kevin Aust

proudly bring you DEQODE, which allows you to "hack" ANY QR code or barcode in real time so you secretly control of where it scans to! It is jam packed with over a dozen routines and is the perfect 'everyday carry' effect! Best of all, it is quick and easy to setup and effortless to learn and perform!

In the featured routine, you display a barcode and ask your participant to guess what item that is from. They write down ANY item in the world they think of on the back of a business card (or in the notes app) and show it around. It is a completely free choice with unlimited possibilities. Despite their freedom, you scan the barcode and unbelievably it brings up a Google result for the precise item they guessed. It can also reveal in the Amazon or Walmart apps! This miracle also works with QR codes, so you can expand the presentation to any celebrity, movie, band, event... ANYTHING!

... But that is only the tip of the iceberg of what is capable! DEQODE also comes with beautiful custom designed props that fit in your wallet and are designed for the plethora of additional routines on the project. Some highlights include open prediction style effects ranging from predicting a movie in IMDB, a music artist in Spotify, an item from a grocery receipt, a three-course meal from a restaurant, a randomly thought of color out of a million options and one of the most commercial ACAAN style effects ever - all of which feature free choices by the participant!

A special playing card is also included that has a QR code camouflaged into its design which when scanned reveals ANY named card! There are nearly a dozen routines with this gaff alone and it can even just live in your deck as an anytime out for any card trick.

One of the best aspects of DEQODE is that it works with ANY QR code or Barcode! This means that ANY code can be scanned, and it will be the reveal of the routine you are performing! Whether you scan a code on the menu at the bar you are performing at, or one randomly generated on the

participant's phone - the possibilities are limitless.

DEQODE is also ideal for humorous gags outside of the magic or mentalism realm. Imagine freaking out your friend by scanning a QR code on their business card and showing them, it mistakenly loads an X-rated website! Or scanning a Pepsi can and it goes to Coca-Cola's website - it's a perfect utility for pranks.
