

JARVIS PRO by SYZ

Caution: It is prohibited from being used for non-magic purposes. Informs you that you are responsible for any non-magic use.

Let me introduce you to the extreme magic of using a mobile phone that makes unimaginable things into reality! SYZ's Jarvis Pro is a mobile phone magic that opens up a whole new world that is different from magic so far.

"Magic audiences don't clap when they're faced with an extremely amazed moment. They buzz and then scream. Jarvis Pro makes the most amazing moment in my show. I want you to experience that moment."

- Charming Choi

Have you ever imagined this? It's ridiculous to say, "If I could get information from the audience's phone, how many endless things would be possible," but what an amazing imagination!

SYZ's Jarvis Pro, which can be used by everyone from enthusiasts to professionals, makes the incredible things you can only imagine a reality! It can be used in any environment such as close-up situations, parlors, and stages, and can be applied in a wide variety of applications. Predictions, pre-shows, and even you can immediately know the audience's mind!

"JARVIS PRO will also affect iPhone sales."

- PH

Routines you can perform with Jarvis Pro

- **Fate**
Talking about fate, the audience thinks of one word, and you write something down on your phone first. Then, the audience writes down the words they were thinking on their phone. Check both phones and the words match exactly!
- **Free Will**
Talking about free will, you first write something down and put it

down. The audience thinks of one of the colors of the rainbow, one of the 52 cards, and one of the many countries and cities. All of them are thought of and said by the audience's free will, but they are written exactly in the memo you wrote down in advance.

- **Portrait**

Audiences freely choose a person from their phones and think of an image of that person. And they pass the image to you in their head. You draw a portrait of the person on your phone. If you check it out... It's a Stick Man painting! It seems like it is passing by cheerfully like a joke, but the name is written at the bottom of the Stick Man. The name is exactly the name of the person the audience thought of!

- **Movie**

The audience thinks of movies, and you also think of movies that you like. Not only do the two movies match exactly, but if you check your notepad, it has exactly the poster and name of the movie.

- **Same Image**

Audiences search for the animals they want on the Internet, and you will guess them. But it is too easy to just guess the animals, so they choose the images they want to make it more difficult. Magicians also search for animals and choose the images. If you check these two, they are exactly the same.

- **Trip (Travel)**

The audience thinks about one place they want to go to and write it down on a notepad. You talk about travel and show a wallpaper with a QR code. When you take a picture of it, you will see a map showing the exact destination they wanted to go to!

- **Country & Time**

The audience goes into the watch app, chooses an area that they want, and even checks the time of the area. You guess the area that the audience thinks of. What's more surprising is your wallpaper! The time Big Ben shown on the wallpaper matches the time of the area that the audience was thinking of!

In addition to this, you can create new effects using Jarvis Pro's principles.

Note:

Jarvis Pro is a magic trick that shows miracles by borrowing the audience's cell phone. However, both the magician's cell phone and the audience's cell phone have to be iPhones.

Due to the nature of Jarvis Pro's trick, one individual system is customized and provided for each buyer. The personal code to confirm this is also included in the package.
