

## Psy Key Nesis by Jimmy Strange

Psychokinesis is the ability to use mental power either to move an object or to bend solid metal...

During the 1970s Uri Geller popularized metal bending by just using his mind and appeared on many TV screens worldwide.

**Psy-Key-Nesis** is a new concept on the key bend.

No need to need to freeze the metal, switch anything, or use a bending device.

With **Psy-Key-Nesis** you always have this with you wherever you go, and whenever you want to show someone the impossible...

Suitable for complete beginners to professional magicians.

The quality machine made gimmick means it's durable, self contained, and resets instantly.
