

Draconian Crimson by Midnight Cards - Pokerdeck

Draconian Crimson Deck:

Inspired by Dragons of lore, the Draconian Crimson Deck exudes the energy of an intense red fire.

Printed by Legends Playing Card Co., the Draconian Crimson cards are printed on their Holographic Foil material (faces and backs)! Continuing the Legends tradition of constant experimentation and innovation, the Card edges feature ULTRA RED, which is an all-new dyed red paper for playing cards. ULTRA RED does not chip, and the deck will look and feel new for much longer.

The Draconian Crimson back card features a borderless optical illusion design formed from Dragon Scales. The semi-custom face cards incorporate a clean design that keeps them functional and provides the highest level of playability.

The classic courts are flanked with the Dragon scales spiral-shaped designs. Each card back and face contains elements of borderless red wildfire fissures throughout a dark red background. The details are crisp, and the colors are striking.

The tuck box highlights a closeup of the hero dragon. The dragon's face fills most of the front of the tuck and wraps around to the side and back of the tuck. The red and gold foils are printed on a premium black matte paper stock. The Draconian Crimson Deck is perfect for any collector, card player, magician, flourisher or fan of Dragons!
