

Perfect Score by Jon Allen

Do you wish you could do a perfect Mercury Card Fold every time?

How about doing a perfect Mercury Card Fold with no visible moves?

Now you can.

Quick. Easy. Natural.

Jon Allen's '**Perfect Score**' is one of THE most valuable tools for magicians. It is difficult to do a really good Mercury Card Fold even after much practice. Now you can easily prepare a card in a few seconds to fold perfectly into quarters or sixths. This preparation changes how you do the fold for the better, as you now only need one action instead of three.

Perfect Score is a rigid template and scoring tool that helps you quickly and easily prepare cards for the Mercury Card Fold. Whatever Card to Box you perform, **Perfect Score** will be a valuable tool for you to prepare the cards... especially for a clear box such as Paragon 3D where a perfectly folded card is visible inside.

Regardless of your card's back design or any misprinting, **Perfect Score** will score your cards in the perfect position every time. You can even score blank cards perfectly into quarters or sixths!

Having a signed card match a perfectly folded duplicate or gimmick is essential, you can use **Perfect Score** for other routines i.e. when you want any 'folded card revelation' to look good; torn & restored card routines and pocket indexes.

Included in the tutorial is Jon's add-a-number prediction routine from his Magic Castle act. The total of several numbers matches the prediction sitting on the table in view the whole time!
