

## WonderFob by Jon Allen

*"A wonderful EDC offering mind-bending magic any time."*

*- Kyle Purnell*

**WonderFob is an EDC that gives you the ability to perform several incredible effects:**

- **Signed card to keyfob** - A freely chosen card is signed and ends up folded into quarters inside your key fob.
- **Lucky Card** - A card that someone ends up selecting as their lucky card matches the card folded inside your key fob.
- **Free Will**- Three completely free choices made by someone are printed on the prediction in your key fob.

*It's such a natural prop to have on you and the one move is naturally motivated too. Whether in your pocket, on the table, or held by someone else, **WonderFob** will deliver fantastic reactions.*

*Create your own gimmicks in the playing card design of your choice.*

*Clip **WonderFob** onto your keyring and you are ready to go!*

**WonderFob** also includes a bespoke six-card pocket index and specially printed cards.
