

Ether by Thibault Ternon x Le Cabinet d'Illusions

"I think it's the most beautiful visual slap in the face I've taken this year. Clever, simple and easy to make. Ideal for pairing with the classic Double Cross."

- David Stone

Master Organic Magic

*What if you finished the Double Cross trick by making a cross appear, in the most visual way possible, on your wrist? It's now possible with **Ether**, an effect that's just as suitable for social networking as it is in real-life conditions!*

Everything you need is included: an explanatory video, the gimmick, and even the tools to build your own. The possibilities are endless: you don't have to make a cross appear, just any little symbol on your wrist.

Features

- *Explanations in English and French*
- *Hand-made gimmick included*
- *A simple yet highly visual process*
- *You can make any other symbol appear instead of a cross; the material is supplied for you to adapt the gimmick.*

Thanks to Florian Flop, CIÃ©mentine Bleurvacq and Jeremy Marouani for their help with this project.
