### **A NEW & IMPROVED: Modern Card to Wallet Insta by Quiver**

Imagine a stylish, ordinary-looking wallet that allows you to perform a miracle at any moment's notice. This will enable you to perform palm and no-palm methods within a single wallet. Quiver Insta will allow you to perform an extremely clean and reliable switch for routines such as:

- An Open Prediction routine, where a prediction card in full view, turns into the spectator's signed card.
- A Dream Card routine, an odd back card in the wallet becomes the spectator's signed card.
- An impossible deck production from the wallet
- A clean switch for lottery prediction, confabulation, and much more.

What have we improved in the new "Insta" version?

- A secure locking system that can be triggered at any time.
- It is a reliable gimmick that will last a long time and can easily be repaired in minutes.
- A brand-new glide is included for a faster load.

For a long time, magicians have been searching for the "perfect" wallet. Card to Wallet by Quiver is a stylish, functional wallet that can be used as an everyday wallet while still allowing you to perform miracles. Our goal is to redesign the traditional wallet with a modern touch. Each wallet is handcrafted with high-quality tan vegetable leather that ages beautifully and lasts long.

What do you receive?

- 50 minutes of instructional video with Patrick Kun.
- A 100% top grain vegetable tanned leather gimmick wallet.
- A NEW Insta gimmick for no palm application.
