

MagSwitch by Patrick Kun & Quiver

As magicians, we want to be able to perform spontaneously anywhere, anytime. That is why we created the **MagSwitch**, a secret switching wallet that hides in plain sight as an everyday MagSafe wallet.

Imagine performing an open prediction effect with your phone, which you already carry with you. This device lets you switch playing cards, bills, coins, business cards, etc.

Quiver provides the highest-quality leather products, and **MagSwitch** is no exception. The gimmick is fully customizable, holds up to four credit cards, and is compatible with all MagSafe devices. We provide an extra MagSafe sticker to use with any phone case, including Android phones.

The package includes:

- MagSwitch leather wallet
- A MagSafe magnet sticker
- Black art fabric
- Over 60-minute long instructional HD video by Patrick Kun, shot with multiple cameras.
- Access to the private Facebook group for more ideas.

Effects:

- Joker Transposition, as performed on TV
- Serial Number Prediction
- Card Under Wallet
- Extra ideas

***The index is not included with MagSwitch**

Dimensions:

- Width: 6.5cm x Height: 9.7cm x Depth:0.9 cm
