

Nana's Necklace (Black) by Dean Dill

Here is the newest and latest version of the classic trick, "*Grandmother's Necklace*."

Effect

Three attractive wooden beads are strung onto the center of two solid velvet cords. The spectator is asked to put his hand out and grasp the three beads in his fist. The spectator holds onto the three beads and the magician ties two of the ends around their hand. The ends of the cords are taken by the Magi and are pulled straight up penetrating through both the spectator's closed fist and the wooden beads. Another miracle has occurred!

In the past, this trick had to be set up ahead of time in order to pull it off successfully. Now, for the first time, you can do this over and over again, setting it up right in front of the spectators. You can even let them help you string the beads onto the cords. This is major breakthrough, and has been confirmed by reputable sources.

Comes complete with 2 black velvet cords, 3 wooden beads and instruction booklet.
