

Crystal Tablet (White Edge) by N2G

"Shin Lim created the same effect in 2015; however, he is flattered that a similar effect has been coincidentally created/released in 2024."

Crystal Tablet

The Omni Deck revolutionized card magic with its innovative effect of transforming an entire deck of cards into transparent form in the spectator's hands. This powerful effect has been a staple for every card magician for over a decade. But this time, there's a twist.

Imagine a deck of cards that turns completely transparent at the end of a trick, except for the spectator's chosen and even signed card, which remains intact. Yes, the card is entirely sealed within a crystal tablet!

This is not just a magic prop, but an artistic masterpiece that pushes the boundaries of traditional card magic. From illusion to tangible reality, the **Crystal Tablet** makes the impossible possible, ushering in a new chapter in card magic.

Unlike previous "transparent card deck" effects, the **Crystal Tablet** allows you to encase the spectator's signed card in the middle of a transparent block, which doubles as a memorable keepsake with great collectible value.

The Crystal Tablet comes in two versions: Pure and White Edge. The **Pure version** is more aesthetically pleasing, while the **White Edge version** adds an extra layer of deception.

Version Options:

Pure Version: Sleek and elegant, the crystal-clear design is love at first sight.

White Edge Version: Enhances the illusion, making the magic even more unfathomable.

Whether on the street or stage, the astonishing effects of the **Crystal Tablet** will garner you applause and acclaim. Let's explore more moments where the impossible becomes possible, making every performance unforgettable.
