

HA-BRACADABRA by David Regal - Buch

This small book of humor is the perfect gift for anyone who loves magic.

David has selected a hundred of his popular cartoons dealing with our craft and given them a place to live, in a charming and beautifully produced 6" x 6" art book.

Over the course of a year, David has written jokes - and made observations - about magic, an art that we all properly treat with reference... most of the time.

He then worked with AI engines to realize the precise images he desired.

The result is **Ha-Bracadabra**.

The book contains no tricks, other than its ability to put a smile on the face of anyone who cracks its covers.

Hardboard, on art paper.
