

Fading (Blue) by Anthony Vasquez

Imagine holding a full deck of cards in your hands. With a magical motion, the cards begin to disappear, one by one, before the eyes of your audience, until only one card remains! That one card turns out to be the spectator's choice.

Fading is not only a powerful tool for vanishing cards, but you can also use it as an opener for other incredible effects. Make all four Aces appear instantly, perform the classic *Rising Card* with a modern twist, or wow your audience with your own creative ideas.

Fading is:

- Easy to use
- Portable
- Very visual

Available in red and blue.
