

Banked - Red, Coca-Cola by Taiwan Ben

"Taiwan Ben has been known to create some of the most practical magic and **Banked** is no exception."

- **Eric Chien (2018 FISM WORLD CHAMPION)**

"**Banked** is the new innovation of the Coin To Bottle effect."

- **Mike Liu**

Banked is an amazing improvement to the Coin Through Bottle effect. You borrow a coin from a spectator, then visibly and instantly slap it through the bottom of ANY plastic bottle. This new version of the effect does not require any glass or "special" bottles or any unnatural handling, and is completely examinable before and after the effect. You can finish your drink (or borrow their empty bottle), borrow a coin, and create INSTANT magic!

Comes with detailed instructions, as well as something special that turns this effect into an almost effortless miracle!

Banked will work with almost any bottle, as well as a range of standard double-folding coins, including the US half dollar, quarter, UK 50p, £2 coins, and any coin of similar size. Please note that you will need to supply your own folding coin.
