

Ring on Rod - Ultimate

Here's a new take on this classic effect, enhanced with ingenious refinements from the creative mind of Vincenzo Di Fatta. The secret is now even more hidden, and the elegance and craftsmanship of this prop will make performing this stunning illusion a true pleasure.

A beautiful wooden box is shown empty and then closed at the front with a panel. A magic wand is placed through the existing slots on the side walls of the box, with both ends of the wand extending out. The performer drops a ring into the box, makes a magical gesture, and then removes the panel, revealing that the ring has mysteriously penetrated the wand, and is now hanging from it!

- All is made with extreme care in Teak wood.
- The base of the box measures cm 13.5 (5,31") x 13.5 (5,31") The box is high, without the inserted panel, cm 14 (5,51").
