NEW CARDS! NEW INSTRUCTIONS! SAME WORLD-CLASS, BEST-IN-CLASS COLOR CHANGING DECK ROUTINE!!!

"I'm giving this 120% - the best color changing deck on the market!"

- Craig Petty, MagicTV

Originally released in the mid 1990's, John Bannon's Strangers Gallery was an instant smash hit. This insanely clever color changing deck routine was easy to do, super visual and the very definition of a commercial trick. It swiftly became the go to solution for this plot. If you wanted to do color changing deck, then you did **Strangers Gallery!**

And then, unlike almost every other commercially released magic product in history, it continued to sell. This thing has been a mainstay in magic shops across the globe for over 25 years! There are many magicians working today who started with this trick! It. Is. EPIC!

Simply put - if you do card magic then you NEED this trick in your repertoire. It requires minimal sleights, has multiple phases and it works as anything from an intimate one on one performance to a stage show closer. It really is that good!

Witness as three selections impossibly share the exact same value as a fourth card chosen at random! Surely that would only be possible if these four cards came from four different decks?! Well, that turns out to be true, because the backs of three cards then change from red to green, yellow and purple!

That's not the kicker though - that would be when **THE COLOR OF THE ENTIRE DECK YOU'RE USING CHANGES!!!**

Comes with four special US Playing Card Company printed cards, beautiful faux hardback book packaging and new, updated video instructions from John Bannon.

Please note - you will need to provide your own deck to add the four special cards to. Any poker size deck will work!

- The 4 specially printed cards (on durable USPCC stock) are supplied in a

wallet for easy transport.

- Easy to do. Uses basic sleights
- Multiple phases. Lots of magic!
- No sticky stuff
- Packaged in a beautiful faux-hardback book - just right to slip onto your shelf and protect your set of gaff cards!
- Impossibly fooling
