

ESP Prediction Board - Bicycle cards - Bühnentrick

The mentalist shows 5 cards with ESP symbols and slides them one by one into one side of a transparent panel. He then shows other 5 cards with the same symbols on them and asks a spectator where he would like to position them on the opposite side of the panel. Incredibly the magician's choice and the spectator's choice for the position of the cards will be exactly the same, and the cards will match perfectly!

- The spectator's cards are chosen and inserted one at a time into the desired slot.
- At any time, the spectator can decide to move the cards of his choice. The prediction will always be correct!
- Everything happens before the eyes of the spectators, you do not have to do anything at all: the trick works by itself.
- Now with ESP Bicycle cards.
